A Uniform 360° Light-Emitting Design

The new LED color module features a new, unique interior lens construction that achieves a fuller, more uniform 360° degree light output. Light color is vibrant with more emission area for reliable indication from further distances.

LME Series (φ60)

LR6 Series (φ60)

More than Twice the Light Output *

The LR Series lens distributes light more efficiently, increasing luminous intensity by more than double that of our current models.

* Based on the φ60 Red LED Model

Unique Method of Fully Enclosed Sound Module

Inspired by a drum percussion instrument, the fully enclosed sound module is able to more efficiently vibrate sound waves, producing even 360° omnidirectional sound resonance. Resistance to water and dust is also increased.

Maximum 90dB* Output

The fully enclosed buzzer module produces more efficient sound, up to 90dB, at 1 meter.

*LR7 buzzer No.4 (Sweep tone)

(Buzzer No.3) Rapid Hi-low Sound
2016Hz/3012Hz

(Buzzer No.4) Sweep Sound
1000Hz - 4032Hz (changing)

New Sounds Heard Above the Noise

1 Alarm available, (2 or more available by special order) from 4 built-in buzzer sounds. Buzzer sounds No. 3 and No. 4 are designed at a higher variable frequency to be heard above the noise of surrounding machinery. Alternatively, a sound reduction function of approx. -10dB is included for use in quieter environments.

* Four Buzzer Sounds

No.1 Rapid Intermittent sound No.2 Continuous sound No.3 Rapid Hi-low No.4 Sweep sound

Modular System Design

Traditional stack lights typically require additional threaded shafts or tools to reconfigure LED units. The LR modular system design redefines signal tower assembly by making customization and repair seamless.

Reorganizing Modules is Effortless

The LR modular system makes reconfiguring the color order simple with its twist-and-lock design. Replacing and reconfiguring LED units or adding a buzzer module is easier than ever.

Smooth Surface

The LR base, LED units and buzzer modules secures together tight and flush, creating a smooth surface, ideal for easy cleaning and water run off.

Environmental Performance

Features a rugged structure with the following ratings: IP65 / NEMA Type 4x, 13 withstands various environmental conditions, such as water and dust.

Upgraded Materials

Upgrading from an ABS to Polycarbonate material, and silicon resin O-rings, results in a more lightweight, shock and water resistant product.

Direct Mount

Easy Wiring

The M12 connection type provides a convenient, single cable mating point.

Easy direct-mount installation
If one hole is placed in the mounting position, it can easily be attached.

* The M12 Conne & Cable (SZ-120) sold separately.

Installation Method 2

Pole Mount

1/2" NPT Support Bracket is designed to fit a 1/2 inch NPT threaded pipe.

Assembly Process

What is HSST?

It is a kit featuring an LR5 Signal Tower, a switch box, AC/DC adaptor, and mounting hardware. This system can be used for a wide range of applications such as, improving efficiency of production assembly lines and discreet communications in call centers.
